NO LEAD BRASS PRESS-TO-CONNECT UNIONS

LegendPress® Unions

Press-type end connections eliminate the need for soldering, reducing labor and material costs and eliminating the fire hazard associated with the process.

Press-to-connect connections are designed for installation onto ASTM B88 types K, L and M hard-drawn copper tubing. Coiled (annealed) soft copper tubing is not recommended, but can be used if ends are made round.

Fittings in nominal sizes 1/2" to 2" feature molded recess O-rings, which when un-pressed, create leak paths at multiple points during the pressure test, to quickly identify an un-pressed joint.

1/2" to 2" sizes use VUS profile jaws.

Working Pressure, Non Shock (PSI)

Cold working pressure (CWP): 200 psi
Saturated steam (WSP): Not suitable for steam service
Operating temperature range: 0°F to 250°F
