

Circuit Actuator

4-WIRE CIRCUIT ACTUATOR

Installation Guide

Description

4-wire Circuit actuator for M-8000, M-8100, and M-8200 series manifolds. 24 volt AC Actuator with 36" leads. Includes end switch that closes when valve is fully open.

Installation

1. Couple the toothed ring to the valve, by pushing it downwards.
2. Mount the head on the ring.
3. Rotate the head 15 clockwise, until you hear the connections click (in order to unfasten the head, rotate it 15 counter-clockwise).
4. After assembly, push the red button inwards.
5. Make the electrical connections, per the project requirements. Blue & Brown are for 24 VAC; Black and Grey are the end switch.
